Contents of Vol. 31

Vol. 31, No. 1

Fracture of ultrafine fibers in the flow of mixtures of non-Newtonian polymer melts
M.V. Tsebrenko, G.P. Danilova (Kiev, U.S.S.R.) and A.Ya. Malkin (Moscow, U.S.S.R.) 1

The reptating rope model: Viscometric functions for concentrated polymer solutions and melts in shear flow
B.J. Geurts (Enschede, The Netherlands) 27

Investigations of the interaction of flowing rubber compounds with boundaries: Basic experiments and air lubricated die
R. Brzoskowski, S.A. Montes, J.L. White and N. Nakajima (Akron, OH, U.S.A.) 43

Drag reduction and rheological properties of cationic viscoelastic surfactant formulations
G.D. Rose (Midland, MI, U.S.A.) and K.L. Foster (Urbana, IL, U.S.A.) 59

The stability of gravity driven viscoelastic film-flow at low to moderate Reynolds number
E.S.G. Shaqfeh, R.G. Larson and G.H. Fredrickson (Murray Hill, NJ, U.S.A.) 87

Short Communication
Some remarks on useful theorems for the second order fluid
P.N. Kaloni (Ontario, Canada) 115

Vol. 31, No. 2

A Gaussian closure of the second-moment equation for a Hookean dumbbell with hydrodynamic interaction
L.E. Wedgewood (Madison, WI, U.S.A.) 127

A decoupled finite element streamline-upwind scheme for viscoelastic flow problems
X.-L. Luo and R.I. Tanner (Sydney, Australia) 143

A low viscosity, highly elastic ideal fluid
K.C. Tam and C. Tiu (Clayton, Australia) 163

Prediction of polymer melt extrudate swell using a differential constitutive model
M.B. Bush (Nedlands, Australia) 179

Numerical simulation of the non-isothermal flow of a nonlinear viscoelastic fluid in a rectangular channel
T. Nikoleris and R. Darby (College Station, TX, U.S.A.) 193

An analysis of the Bird–DeAguiar model for polymer melts
M.C. Calderer (Fairfax, VA, U.S.A.), L.P. Cook and G. Schleiniger (Newark, DE, U.S.A.) ... 209

Vol. 31, No. 3

Calculations of steady-state viscoelastic flow in an undulating tube
S.Pilitsis and A.N. Beris (Newark, DE, U.S.A.) 231

Calculations of steady-state viscoelastic flow in an undulating tube
S.Pilitsis and A.N. Beris (Newark, DE, U.S.A.) 231

Stress growth in dilute solutions of macromolecules in a non-Newtonian solvent
W. Stasiak and C. Cohen (Ithaca, NY, U.S.A.) 289

Similarity solutions that give rise to hyperbolicity and change of type in steady flow of a viscoelastic fluid
C. Verdier and D.D. Joseph (Minneapolis, MN, U.S.A.) 301

Change of type and loss of evolution of the White-Metzner model
C. Verdier and D.D. Joseph (Minneapolis, MN, U.S.A.) 325
